## Appendix B - Examples of Line Extension Calculations

### II. Second Action: One new service drop added

Cost Allocation (calculations do not reflect depreciation)

Action		Ft from primary line	Calculation of feet allocated to each customer	Calculation of share paid by each customer to cost of initial line extension	Cost Allocation after each action
I (customer A)	Initial line extension	3000	3000 ft paid by A		A: \$18,000
II (customer B)	1st additional extension	1000	1000/2 = 500 ft shared by A ,B 2000 ft paid by A	A: (500 +2000) / 3000 = .8333 B: 500 / 3000 = .1667	A: .8333x\$18,000 = \$15,000 B: .1667x\$18,000 = \$ 3,000

Payments After Action II

Customer	Calculation of Payment Made	Calculation of Payment Received
A		\$18,000 - \$15,000 = \$3,000
B	\$3,000
